7. Put rtx_themepark and rtx_themepark_objects to the server.cfg

Common issues:

----
2 Ferris wheels in Theme Park:

If you see 2 Ferris Wheel, it is because you have some IPL loader on the server that loads the old wheel, you need to disable this IPL, here is an example how to disable the old Ferris Wheel in bob74_ipl

In bob74_ipl/gtav/base.lua at bottom remove RequestIpl("ferris_finale_anim")

Need a vehicle key to start bumper car:

You need to add to your script with vehicle keys, the whitelist for our vehicle, the vehicle name is: rtxbumper

----
Object names for whitelist to anticheat:

prop_cs_hotdog_02
prop_cs_burger_01
sempre_delperropier_popcorn_box
sempre_delperropier_candycotton_prop

sempre_delperropier_balloon_b
sempre_delperropier_balloon_g
sempre_delperropier_balloon_p
sempre_delperropier_balloon_r
sempre_delperropier_bus_blue_screen
sempre_delperropier_bus_red_screen
sempre_delperropier_bus_target
